ACCOUNTING POLICIES

for the year ended 31 December 2002

The financial statements have been prepared in accordance with applicable Accounting Standards in the United Kingdom. A summary of the principal accounting policies, which have been applied consistently, is set out below.

BASIS OF ACCOUNTING.

The financial statements have been prepared under the historical cost convention.

FIXED ASSETS AND DEPRECIATION

Tangible fixed assets are shown at original purchase cost less accumulated depreciation. Depreciation is provided on all tangible fixed assets at rates calculated to write each asset down to its estimated residual value evenly over its expected useful life, as follows:-

Motor Vehicles	25%
Plant and Equipment	10%
Furnishings	10%

STOCKS

Stocks are valued at the lower of cost and net realisable value. Net realisable value is based on estimated selling price less further costs expected to be incurred to completion and disposal. Provision is made for obsolete and slow-moving items.

OPERATING LEASES

Rentals applicable to operating leases where substantially all of the benefits and risks of ownership remain with the lessor are charged to the statement of financial activities on a straight line basis over the lease term.

FOREIGN CURRENCY TRANSLATIONS

Assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the balance sheet date. Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. All differences are taken to the profit and loss account.

PENSION CONTRIBUTIONS

The costs of providing pensions is calculated using actuarial valuation methods which reflect the long-term costs of providing such pensions.

For defined benefit schemes the regular cost of providing for pensions is calculated so as to produce a substantially level percentage of the current and estimated future pensionable payroll; variations from the regular cost so calculated are allocated to the income and expenditure account over the average remaining service lives of employees.

The company has adopted the transitional arrangements of FRS17 "Retirement Benefits" for the year ended 31 December 2002. The disclosures required by this standard are shown in note 19. As permitted by its transitional arrangements, figures arising under the standard have not been reflected in the financial statements.

TURNOVER

Turnover represents the invoiced value, net of Value Added Tax, of goods sold and services provided to customers.

CASH FLOW STATEMENT

The company has taken advantage of the exemption available under FRS1 not to prepare a Cash Flow Statement on grounds that it is a 'Small' Company under the Companies Act 1985.

ACCOUNTING POLICIES
for the year ended 31 December 2002

GOING CONCERN

The ultimate parent companies have undertaken to continue their financial support of the company to the extent of, and as long as there exists a deficiency of shareholders' funds, and for at least the next 12 months from the approval of the accounts.

DEFERRED TAXATION

Following the introduction of FRS19, the company has changed its accounting policy in respect of deferred tax. Previously deferred taxation was only provided to the extent that it was probable a liability of asset would crystallise. Now deferred tax balances are recognised in respect of all timing differences that have originated but not been reversed by the balance sheet date, except that the recognition of deferred tax assets is limited to the extent that the company anticipates to make sufficient taxable profits in the future to absorb the reversal of the underlying timing differences. Deferred tax balances are not discounted.
